

Title: Supplementary Data 1.

Description: Top genes enriched in each cluster annotated for human fetal pancreas

Title: Supplementary Data 2.

Description: InterCom analysis of ligand-receptor pairs and downstream pathways

Title: Supplementary Data 3.

Description: Cell-cell communication networks inferred by state-of-the-art tools Cell-cell communication networks from each tool for each sample are provided together with a classification whether the interaction is unique or common to an interaction in the corresponding Intercom network.

Title: Supplementary Data 4.

Description: Genes differentially regulated upon expansion from Trott et al. (2017)"
