

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Differentially expressed genes in RNA-seq assays of *X. citri* pv. *citri* 306 strain. Cells were grown in minimal medium XVM2m containing xyloglucan oligosaccharides, and the $\log_2$ fold change values are relative to the minimal medium XVM2m containing glucose as a reference. Genes were considered differentially expressed according to Wald test implemented in the DESeq2 package. p -values were adjusted for multiple tests using Benjamini-Hochberg (BH) method also implemented in the DESeq2 package. Thresholds: $|\log_2 \text{ fold change}| \geq 1$ and $p\text{-adjusted} \leq 0.05$.
