Editorial Note: This manuscript has been previously reviewed at another journal that is not operating a transparent peer review scheme. This document only contains reviewer comments and rebuttal letters for versions considered at Nature Communications.

Reviewers' Comments:

Reviewer #1:

Remarks to the Author:

Thanks to the ample revision work and additional clarifications the work has greatly improved and shall be published.

Reviewer #3:

Remarks to the Author:

The authors have addressed my main concerns, I can now recommend the manuscript for publication.

Reviewer #1 (Remarks to the Author):

Thanks to the ample revision work and additional clarifications the work has greatly improved and shall be published.
