

Supplementary Data 1: list of differentially expressed genes (DEGs) per every cluster at 5 dpi showing gene name, average expression levels per cluster, multiple-testing adjusted p-values and fold changes.

This table is submitted as separate excel file.

Supplementary Data 2: list of differentially expressed genes (DEGs) per every cluster at 14 dpi showing gene name, average expression levels per cluster, multiple-testing adjusted p-values and fold changes.

This table is submitted as separate excel file.

Supplementary Data 3: Overview of ADI cells gene expression within clusters.

This table is submitted as separate excel file.

Supplementary Data 4: average expression of single ADI genes per cluster at 5 dpi.

This table is submitted as separate excel file.

Supplementary Data 5: average expression of single ADI genes per cluster at 14 dpi.

This table is submitted as separate excel file.
