

Description of Additional Supplementary Files

Supplementary Data 1: Sample metadata, RT-qPCR data, and sequencing data for all samples. The file contains (i) sample information, including collection date, state, and NCBI BioSample accession codes; (ii) taxonomic classification of viral reads by Microsoft Premonition; (iii) viral genome assembly data; (iv) viruses detected in each sample; (v) reference sequences used for reference-guided genome assembly; (vi) RT-qPCR data for all samples screened with the common pathogens panel.
