

Description of Additional Supplementary Files

Supplementary Movie 1. Morphological changes of the plasma membrane during asymmetric CCP closing. Representative movie of asymmetric CCP closing in Cos7 cells captured using HS-AFM. Images were taken every 2 s. The height information of the AFM image is presented using a colour bar. Image size on the x-y plane: $1.0 \times 1.0 \mu\text{m}^2$.

Supplementary Movie 2. Morphological changes of the plasma membrane during symmetric CCP closing. Representative movie of symmetric CCP closing in Cos7 cells captured using HS-AFM. Images were taken every 2 s. The height information of the AFM image is presented using a colour bar. Image size on the x-y plane: $1.0 \times 1.0 \mu\text{m}^2$.

Supplementary Movie 3. Morphological changes of the plasma membrane during undetermined CCP closing. Representative movie of undetermined CCP closing in Cos7 cells captured using HS-AFM. Images were taken every 2 s. The height information of the AFM image is presented using a colour bar. Image size on the x-y plane: $1.0 \times 1.0 \mu\text{m}^2$.
