C

Source Data Figure 1 – Complete Western blots for Supplementary Figure 9B. The membrane was cut into two pieces horizontally, *hsGet2* (**A**) and PGK1 (**B**) were detected on one of the pieces, and *hsGet1* (**C**) on the other one. Loading order from left to right on all blots: protein ladder, 4x (wildtype, W158A mutant, $\Delta\alpha3'$ mutant), 1x control empty vector, protein ladder.
