

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Human differentially expressed genes

File Name: Supplementary Data 2

Description: Gene ontology results for human differentially expressed genes

File Name: Supplementary Data 3

Description: Gene names of RNAs bound by hnRNP A1 in mouse spinal cords common between CLIPper and assembly approaches and used for subsequent analyses

File Name: Supplementary Data 4

Description: Gene ontology results for hnRNP A1-bound RNAs from mouse spinal cord
