REVIEWERS' COMMENTS

Reviewer #2 (Remarks to the Author):

The authors have done a thorough job addressing my concerns. I am still not satisfied with the fact that the authors only tested the combination of C-to-U and A-to-I rBEs in reporter constructs and not in real cells, but I am okay with not including this in this manuscript.

Reviewer #3 (Remarks to the Author):

The authors have addressed and satisfied all raised comments and concerns. I recommend publication of this manuscript that will be a useful resource for the RNA field.
