

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Relative abundance of putative HCF-1 interactors identified through immunoprecipitation-mass spec experiments

File Name: Supplementary Data 2

Description: CUT&RUN binding sites (peaks and genes) under basal conditions in *C. elegans*

File Name: Supplementary Data 3

Description: Integration of RNA-seq and CUT&RUN data in *C. elegans* mutants

File Name: Supplementary Data 4

Description: CUT&RUN binding sites (peaks and genes) in mutant backgrounds in *C. elegans*

File Name: Supplementary Data 5

Description: *C. elegans* strains, primer sequences, and antibodies used in this study
