

Description of Additional Supplementary Files

File Name: Supplementary Data 1

Description: Statistical procedures and test results for each figure panel (separate sheet in the Excel file).

File Name: Supplementary Data 2

Description: Outlier taxa in inoculated compared to non-inoculated soil microcosms. See also Fig. 3c.

File Name: Supplementary Data 3

Description: Outlier taxa in inoculated compared to non-inoculated soil microcosms in presence of toluene. See also Fig. 3d and Supplementary Fig. 3.

File Name: Supplementary Data 4

Description: Diversity measures of bead communities after 48 h incubation. See also Fig. 5.

File Name: Supplementary Data 5

Description: Taxa outliers in inoculant-soil cell paired bead incubations. See also Fig. 5b.

File Name: Supplementary Data 6

Description: KEGG identifiers in toluene or toluene intermediate degradation. See also Fig. 6c.
