Editorial Note: This manuscript has been previously reviewed at another journal that is not operating a transparent peer review scheme. This document only contains reviewer comments and rebuttal letters for versions considered at *Nature Communications*.

Reviewer #1 (Remarks to the Author):

I am satisfied with the revision and have no further concerns.

Reviewer #2 (Remarks to the Author):

The authors have adequately addressed all my questions and concerns. I found only one small error in wording in one of the newly introduced sentences. It should read:

"HrAgo1 clusters with and has the same conserved domains as eAgos ..."

After correcting this sentence, the manuscript is ready for publication.

The responses are in blue.

Reviewer #1 (Remarks to the Author):

I am satisfied with the revision and have no further concerns.

We thank the reviewer for the thorough review of our paper.

Reviewer #2 (Remarks to the Author):

The authors have adequately addressed all my questions and concerns. I found only one small error in wording in one of the newly introduced sentences. It should read:

"HrAgo1 clusters with and has the same conserved domains as eAgo1 ..."

After correcting this sentence, the manuscript is ready for publication.

We thank the reviewer for the thorough review of our paper. The sentence is now corrected.
