

Description of Additional Supplementary Files:

Supplementary Data 1: Examination of the distribution of T1- antigen biosynthesis genes in *Salmonella* genomes deposited in the SalFoS database. A tBLASTn search was used to search each isolate in the SalFoS database for each of the genes (STM0719-0726) in the T1-biosynthesis cluster. Isolates containing intact versions of all of the genes in the cluster were considered T1 positive.
