

Description of Additional Supplementary Files

File Name: Supplementary Video 1

Title: The video of FeCl₃-induced mesenteric thrombus formation in *Rosa26^{fl/fl}* and *hDAB2-KI* mice.

Description: The fluorescent dye DiOC₆ was injected into mouse through orbital venous plexus and then thrombosis in the mesenteric arterioles (A) and venules (V) was induced by FeCl₃. The thrombus formation of *Rosa26^{fl/fl}* and *hDAB2-KI* mice was video recorded using a fluorescence microscope.

File Name: Supplementary Data 1

Description: Dab2-interacting proteins in resting and U46619-stimulated human platelets were pulled down by immunoprecipitation. Relative quantification of the identified proteins was performed in Proteome Discoverer 1.4 Software (Thermo Fisher Scientific).
