

Description of Additional Supplementary Files

Supplementary Data 1:

Dataset of the 764 case studies used for the statistical analyses (descriptive, meta-analysis and regression analysis). For each restoration intervention, reported are data on: the biogeographic region, country, site, latitude, longitude, Global Cumulative Impact Index value, ecosystem typology, intervention year and extension, % survival, success considering the threshold of $\geq 50\%$ survival; unsuccess as survival >0 but $<50\%$ and complete failures ($\%$ survival = 0%). Reported are also the yrs after intervention for which we have monitoring data available.
