

Description of Additional Supplementary Files

Supplementary Dataset 1:

¹H (700 MHz) and ¹³C (175 MHz) NMR spectroscopic data of AH5011 hominidin in methanol-*d*₃.

Supplementary Dataset 2:

Strains used for susceptibility testing. Species, strain identifiers, descriptions, isolation origins, and sources are provided for each strain used in the broth inhibition assay presented in Figure 1b. AMC, University of Colorado Anschutz Medical Campus; UCSD, University of California, San Diego; CBMRN, Canadian Bovine Mastitis Research Network; FDA-ARGOS, US Food & Drug Administration Database for Reference Grade Microbial Sequences.

Supplementary Data 3:

Strains used for susceptibility testing. Species, strain identifiers, descriptions, isolation origins, and sources are provided for each strain used in the broth inhibition assay presented in Figure 1b. AMC, University of Colorado Anschutz Medical Campus; UCSD, University of California, San Diego; CBMRN, Canadian Bovine Mastitis Research Network; FDA-ARGOS, US Food & Drug Administration Database for Reference Grade Microbial Sequences.
