

Description of Additional Supplementary Files

File Name: **Supplementary Data 1**

Description: Mass spectrometry label-free quantification data and processed statistical results used to generate the volcano plots in **Figure 1**.

File Name: **Supplementary Data 2**

Description: Mass spectrometry label-free quantification data and processed statistical results used to generate the volcano plots in **Supplementary Figure 1**.

File Name: **Supplementary Data 3**

Description: Mass spectrometry label-free quantification data and processed statistical results used to generate the volcano plots in **Figure 2**.

File Name: **Supplementary Data 4**

Description: Mass spectrometry label-free quantification data used for DCAF10 quantification in control and siRNA treated cells in **Figure 4**.

File Name: **Supplementary Data 5**

Description: Mass spectrometry label-free quantification data used for ZYG11B quantification in control and siRNA treated cells in **Figure 4**.

File Name: **Supplementary Data 6**

Description: Mass spectrometry label-free quantification data used to confirm Lyn KO and compare proteomes of KO clones and parental cells in **Supplementary Figure 7**.

File Name: **Supplementary Data 7**

Description: Mass spectrometry label-free quantification data and processed statistical results used to generate the volcano plots in **Supplementary Figure 7**.

File Name: **Supplementary Data 8**

Description: Mass spectrometry label-free quantification data and processed statistical results used to generate the volcano plots in **Figure 6**.
