

Title: Supplementary Data 1

Description: Results of high-throughput ADP-ribosylome profiling. This dataset lists the candidate host substrates of OspC1 and OspC3 identified by mass spectrometry.

Title: Supplementary Data 2

Description: Quantitative analysis of the SEPT9 interactome. This dataset provides the list of SEPT9-interacting proteins identified by IP-MS, including quantification of interaction changes and statistical significance.

Title: Supplementary Data 3

Description: Oligonucleotide sequences used in this study.
