

Title: Supplementary Video 1

Description: Mu208 att:: PglpTmCherry time lapse microscopy immediately before and for 5 h following addition of 128 µg/mL fosfomycin. Time is shown in the upper left and scale bar in the bottom right.

Title: Supplementary Data 1

Description: Copy number variation (CNV) state of genomes of fosfomycin resistant colonies. The mean of CNV value from 7 biological replicates collected on agar containing 256 µg/mL fosfomycin.

Title: Supplementary Data 2

Description: Transposon hits. List of identified transposon insertions, those highlighted were investigated in this manuscript.

Title: Supplementary Data 3

Description: Primers used in this study.
