

Supplementary Fig 1 The raw scan of agarose gel showing the lengths of mRNAs encoding different structural domains of RABV-G. The gel lanes from left to right are RNA Marker, RABV-Full, RABV-TE, RABV-E and RABV-R333Q.

Supplementary Fig 2 The raw scan of western blot showing protein expression of mRNAs encoding different structural domains of RABV-G. The gel lanes from left to right are Protein Marker, Control, RABV-Full, RABV-TE, RABV-E and RABV-R333Q.
