

Supplementary Data 1

Ubiquitous abundance distribution of non-dominant plankton across the world's ocean

Enrico Ser-Giacomi, Lucie Zinger*, Shruti Malviya*,
Colomban De Vargas, Eric Karsenti, Chris Bowler, Silvia De Monte

This supplementary information provides all SADs, RADs and associated fits considered in this study. Each page corresponds to a single station and organism size fraction (specified in the plot title).

Figures legend:

Top: SAD plot. The solid black line corresponds to the fitting model distribution, the blue line to n_{max} . The topright inset indicates the values for λ , n_{max} and the p-value associated to the fit.

Bottom: RAD plot. The blue line corresponds to n_{max} .
