Supplementary Table 1: List of chimpanzee specimens. Data from KUPRI (Digital Morphology Museum, Kyoto University Primate Research Institute) and CARTA (Center for Academic Research and Training in Anthropogeny at the University of California, San Diego) were freely available. The specimens from the NHM (Natural History Museum Vienna, Austria) were surface-scanned and kindly shared by Martin Häusler and colleagues. Sex is indicated as female (F) and male (M); Age is in years. NA indicates missing data. Disarticulated pelves were manually recomposed in Geomagic.
