
Supplementary information

**FOXO1 enhances CAR T cell stemness,
metabolic fitness and efficacy**

In the format provided by the
authors and unedited

a**b**

Supplementary Figure 1: Gating strategy for the analysis of mouse (**a**) and human (**b**) CAR T cells by flow cytometry. Cell doublets were excluded by gating cells on the diagonal of FSC-A/FSC-H. Dead cells were excluded by staining with LIVE/DEAD™ Fixable Yellow Dead Cell Stain (ThermoFisher). **a**, mouse CD8⁺ CAR T cells were defined as Thy1.2⁺ CD8⁺ NGFR⁺. **b**, human CAR T cells were defined as Flag⁺ and CD4⁺ or CD8⁺.
