Proteotoxic stress response drives T cell exhaustion and immune evasion

In the format provided by the
authors and unedited

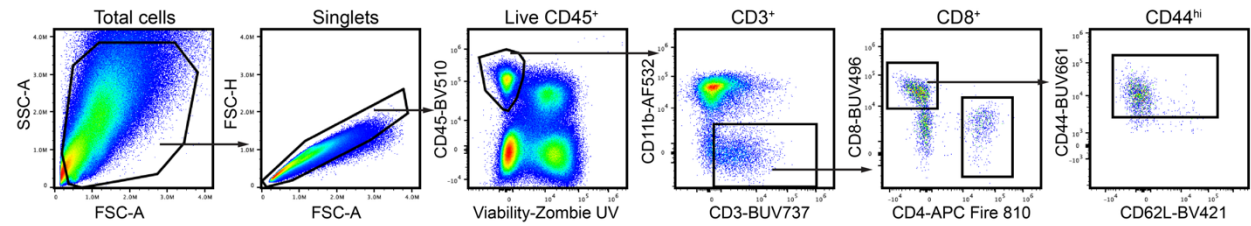

Supplementary Figure 1: Uncropped images for immunoblot analysis

a, Uncropped whole blot image of immunoblot analysis in **Fig. 2l**. Soluble fraction of cell lysates were resolved by Native-PAGE gel. **b**, Uncropped image of immunoblot analysis in **Fig. 2m**. Soluble fraction of cell lysates were resolved by SDS-PAGE gel. **c**, Uncropped image of immunoblot analysis in **Fig. 2n**. Insoluble fraction of cell lysates were resolved by SDS-PAGE gel.

Supplementary Figure 2: Gating strategies for tumor infiltrating T cell analysis

a

a. Gating strategies for analyzing tumor infiltrating antigen-experienced CD8⁺ T cells related to

Fig. 1g, Fig. 2c, d, f, Fig. 3g, Fig. 4p and Fig. 5m, n.
