

Extended Figure 9b

Gel ran together

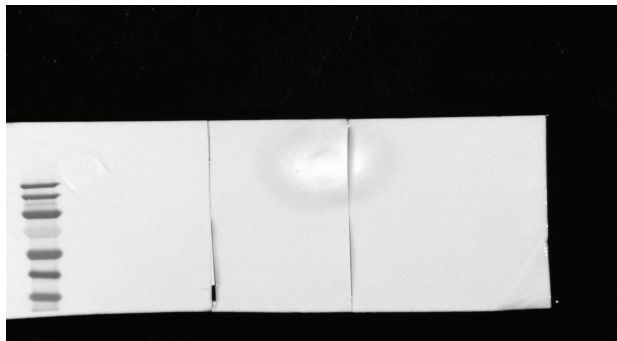

Lane 1: Ladder

2-4: MUC4 (Extended Figure 6b)

5-7: MUC5AC

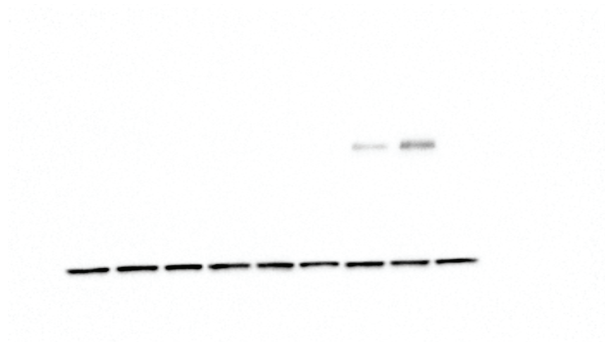

8-10: MUC1 (Extended Figure 6b)

Membrane was cut, antibody staining done individually
Imaged together, aligned on fluorescent channel

Extended Figure 9b

Brightfield accompanying anti-B-Actin Stain
(same orientation, can be overlayed)

Extended Figure 9b

Probed anti-B-actin (loading control)

Imaged in chemiluminescent channel (HRP)
