

Systemic inflammation impairs myelopoiesis and interferon type I responses in humans

In the format provided by the
authors and unedited

Supplementary Table 1. Baseline characteristics of healthy male volunteers

	LPS-challenged group (n=7)	Placebo group (n=4)
Age (years)	24 [19-30]	19 [18-28]
Height (cm)	183 [181-187]	186 [174-194]
Weight (kg)	85 [79-91]	83 [72-90]
BMI	26 [24-27]	24 [22-26]
Leukocytes (10 ⁹ /L)	6 [5-9]	6 [3-9]

Data in median [range]

Supplementary Table 4. Number of RNA-seq profiled single-cells after quality control

Tissue	Time Point	Donor				Total
		Donor 1	Donor 2	Donor 3	Donor 4	
Bone Marrow	Day 0	6640	7694	4794	-	19128
	4 hours	4224	7562	5469	-	17255
	Day 7	8004	7463	5940	-	21407
PBMC	Day 0	9709	-	9629	7448	26786
	4 hours	5511	-	1425	1762	8698
	Day 7	7366	-	7920	7623	22909
	Total	41454	22719	35177	16833	116183
