

## Source Data S1 -- Full Blots for WB in Fig.1

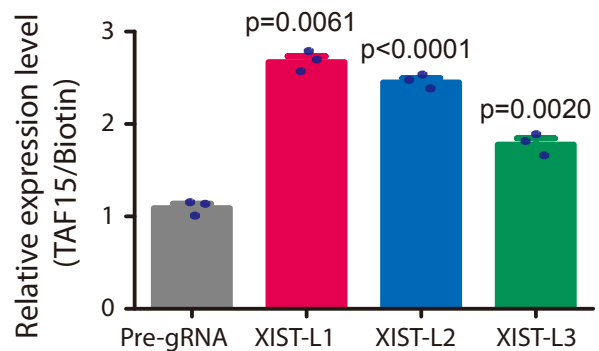

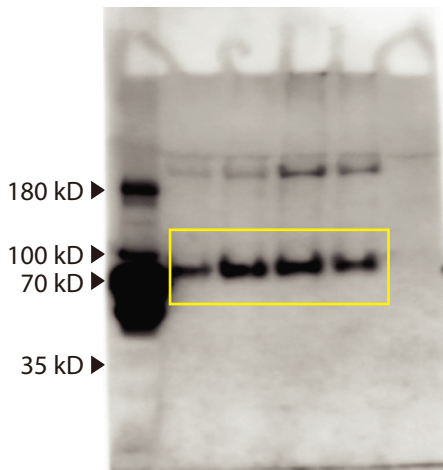

**For Fig. 1c  
(input for TAF15)**

**For Fig. 1f  
(TAF15)**

**For Fig. 1c  
(IP for TAF15)**

ImageJ software (version 1.8.0\_172) was employed to quantify the WB signals. The barplot above shows the TAF15 IP signals (IP for TAF15) normalized to corresponding input signals (input for TAF15) using biotin-BASU-dCasRx as controls (Biotin). mean  $\pm$  SEM,  $n = 3$  independent experiments, ordinary one-sided ANOVA test.
