Mapping Refrigerant Gases in the New York City Skyline

*Masoud Ghandehari¹, Milad Aghamohamadnia¹, Gregory Dobler¹, Andreas Karpf¹,
Kerry Buckland², Jun Qian², Steven Koonin¹*

¹ New York University, ² The Aerospace Corporation

Caption: “The video was created by animating multiple plume images into a time resolved depiction of their size and location”.

Information for the editor: The images were obtained by post-processing data cubes using software HyperSEAL 7.9.0, developed by the authors, a similar process used for deriving the images shown in figures 1,7, and 8. HyperSEAL is a proprietary product of The Aerospace Corporation, which holds the rights to authorize publication of content produced with that software. <http://www.aerospace.org/>
