

Detection of malaria sporozoites expelled during mosquito sugar feeding

Brugman, V. A., Kristan, M., Gibbins, M. P., Angrisano, F., Sala, K.A., Dessens, J. T., Blagborough, A. M., & Walker, T.

Supplementary Figure S1: Experimental setup for sugar-feeding *Plasmodium*-infected *Anopheles* mosquitoes. (A) Simultaneous supply of sugar-soaked indicating Whatman FTA card and sugar-soaked cotton wool pad; (B) Supply of sugar via indicating Whatman FTA card only; (C) Groups of three mosquitoes maintained in small tubes with access to sugar via either indicating Whatman FTA card or sugar-soaked cotton wool pad. Note that for the FTA card setups, sugar-soaked cotton wool was placed on top of each FTA card in order to prevent drying, but mosquitoes were only able to consume sugar from the cards.
