

AN ADULT ZEBRAFISH MODEL REVEALS THAT MUCORMYCOSIS INDUCES APOPTOSIS OF INFECTED MACROPHAGES

Azucena López-Muñoz, Francisco E. Nicolás, Diana García-Moreno, Ana B. Pérez-Oliva, María I. Navarro-Mendoza, Miguel A. Hernández-Oñate, Alfredo Herrera-Estrella, Santiago Torres-Martínez, Rosa M. Ruiz-Vázquez, Victoriano Garre and Victoriano Mulero

Figure S1. Gene Ontology (GO) annotation at level 2 of differentially expressed genes. A. Graph shows the mapping of the up-regulated genes on GO terms. **B.** Graph shows the mapping of the down-regulated genes on GO terms. The categories of cellular component, biological process and molecular function are indicated in blue, orange and green bars, respectively.
