

Supplementary Fig. 1 The box and whisker plots illustrate the number of BM at each GKRS procedure. The boxes indicate the 25th and 75th percentiles. The whisker indicates the minimum and maximum value, dots indicate the outliers, asterisk indicates extreme values, and thick horizontal lines indicate the median value.

BM, brain metastases; GKRS, gamma knife radiosurgery.

Patients with multiple (≥ 5) BM (N=64)

Supplementary Fig. 2 Treatment of patient with multiple (≥ 5) brain metastases (BM).

SRS, stereotactic radiosurgery; WBRT, whole-brain radiotherapy.
