Supplementary Fig. S1

Kaplan-Meier plots for the time to each event

A: Between the time that the second invitation letter was sent to the participants and the time that the self-sampling human papillomavirus (HPV) test was ordered by the

participants.

B: Between the time that the self-sampling HPV test was ordered and the time that the kit was sent to the participants.

C: Between the time that the kit was sent to the participants and the time a sample was returned.

D: Between the time that a sample was collected by the participants and the time a sample was returned.

E: Between the time that a sample was returned by the participants and the HPV test was ordered to the laboratory.

F: Between the time that the HPV test ordered to the laboratory and the results were reported by the laboratory.

G: Between the time that the results were reported by the laboratory and the results were sent to the participants.

H: Between the time that the second invitation letter was sent to the participants and the time that the HPV test results were sent to the participants.
