

Supplementary Figure 1. Change in deep vessel density (VD) before and after minimally invasive glaucoma surgery. Each line graph shows the individual change in the deep VD before and after minimally invasive glaucoma surgery. **a.** Changes in the deep VDs for all cases (N = 31). **b.** Changes in the deep VDs in the successful group (N = 21). **c.** Changes in the deep VDs in the unsuccessful group (N = 10).
