

Supplementary Figure 1. NSA did not affect the expression of RIPK1 and RIPK3 proteins in MPTP-treated mice. (a) Western blot analysis of the SN region shows that MPTP treatment increased the expression levels of RIPK1 and RIPK3 proteins compared to control mice. However, the RIPK1/3 levels induced by MPTP were not altered by NSA treatment. (b) A quantification diagram of the RIPK1 and RIPK3 protein levels (for RIPK1, $F_{3,12} = 8.16$; for RIPK3, $F_{3,12} = 9.61$; $N = 4$ for each group). * denotes $p < 0.05$.
