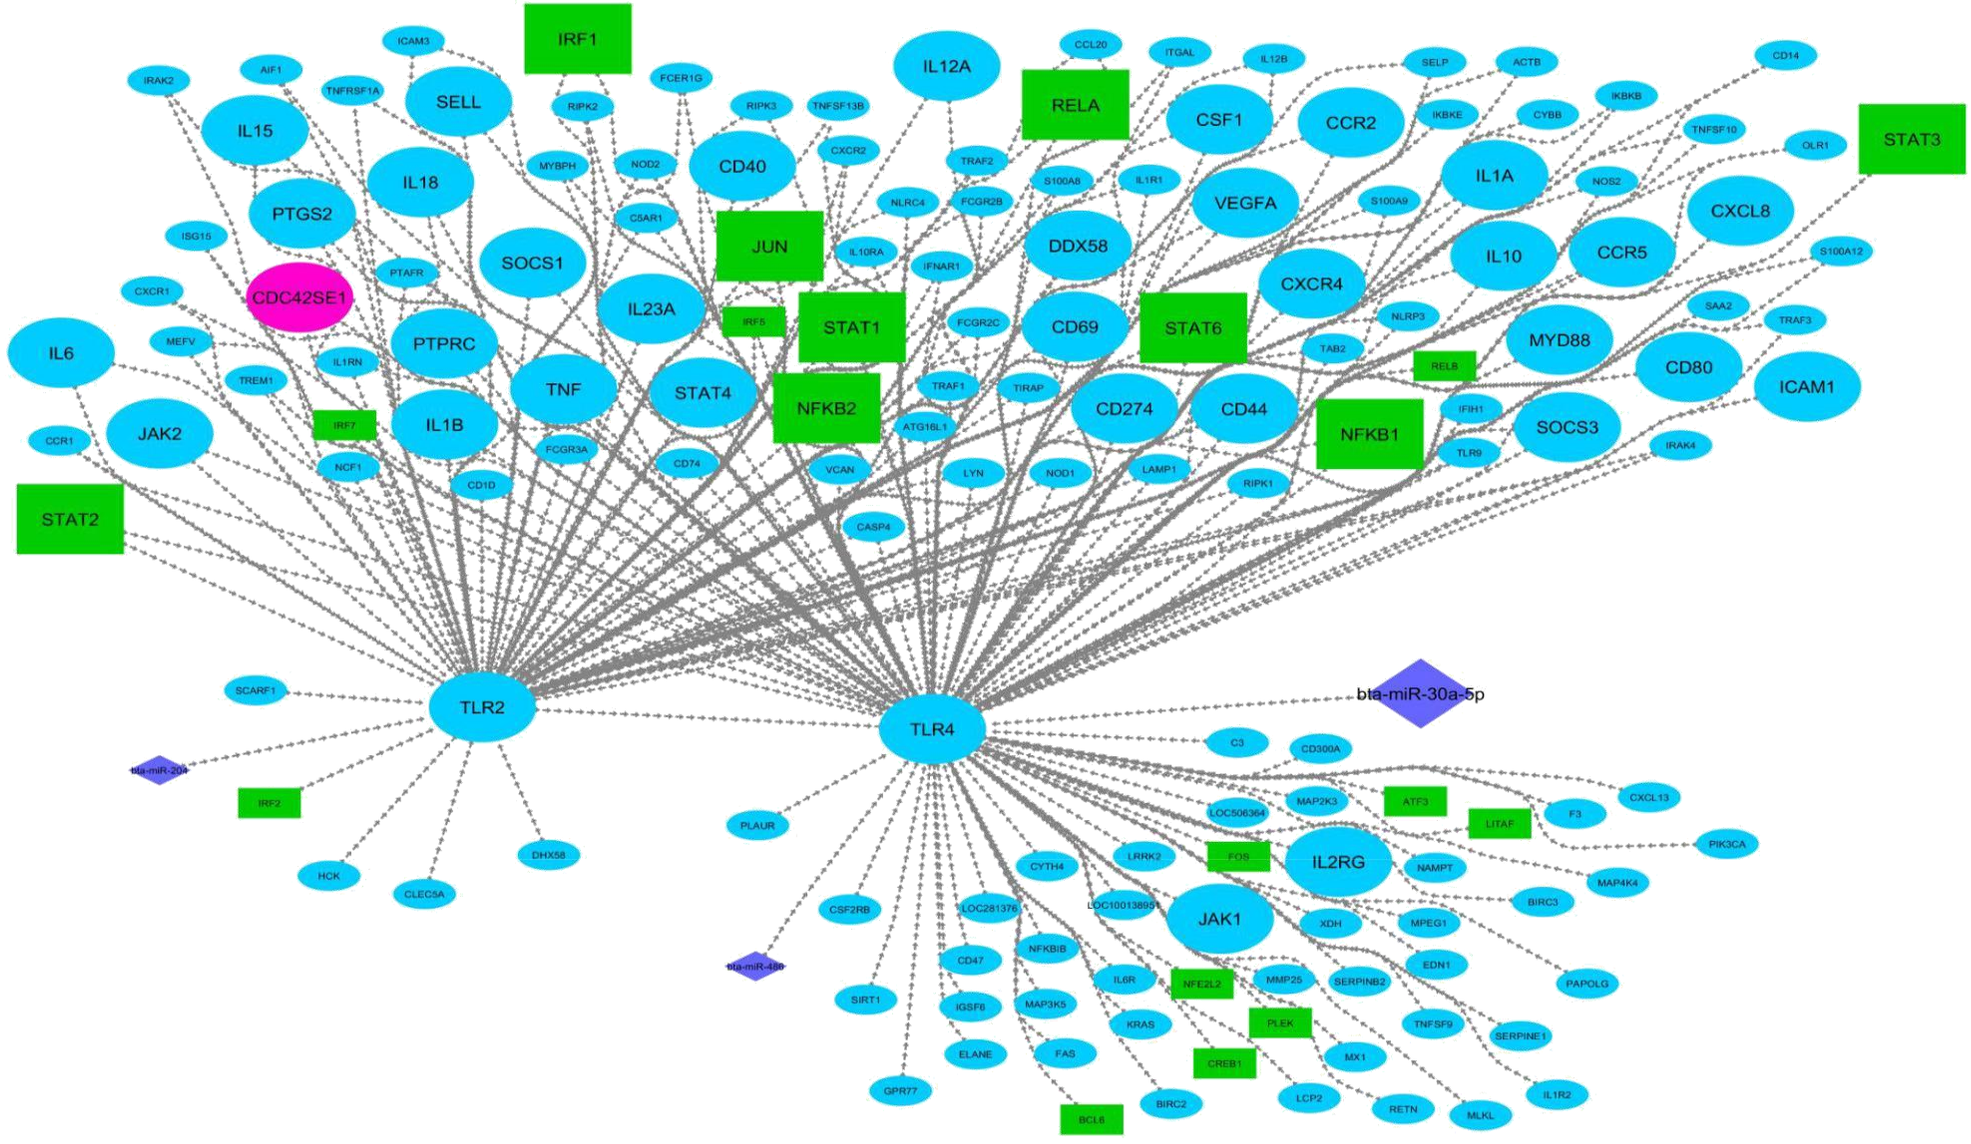
Supplementary File S13: The sub-networks of important inflammatory hub-hub genes during mastitis.



The constructed integrated regulatory sub-network related to *TLR2*, and *TLR4* hub-hub genes. Small circles and rectangles represent hub genes and hub transcription factors (TFs) of the turquoise RNA-seq-based module, respectively. Small diamonds represent regulatory miRNAs of the blue miRNA-seq-based module. On the other hand, large circles and rectangles represent hub-hub genes and hub-hub TFs of the turquoise RNA-seq-based module, respectively. large diamonds represent hub miRNAs of the blue miRNA-seq-based module. Additionally, the large pink octagon represents the only hub-hub lncRNA in the turquoise RNA-seq-based module. Cytoscape software (version 3.7.1) (https://cytoscape.org/) was used to generate this figure.
