

Figure S1. Heatmap representation of log₂FC in miR165a cells versus other cell-types in sub-epidermis. Alongside the log₂FC heatmap, enriched GO terms and associated p-value in individual cluster has been shown.

Figure S2. Overlap analysis of DEGs identified after ectopic expression of REV in epidermis (pML1>>REVr) (Ram et al., 2020), and after over-expression of miR165a (pAtUBQ10>>miR165a) in this study.
