

Down-regulated host (macrophage) proteins (Biological Process) Treeplot (top50)

Up-regulated host (macrophage) proteins (Biological Process) Treeplot (top50)

Figure S1 Enrichment of upregulated and downregulated proteins in infected macrophage compared to non-infected macrophages

(A) GO enrichment biological process performed on the differential macrophage downregulated proteins using ClusterProfiler, ranked according to adjusted p-value (here top50). (B) GO enrichment biological process performed on the differential macrophage upregulated proteins using ClusterProfiler, ranked according to adjusted p-value (here top50).
