

Supplementary Figure 1. Results from the EQ-VAS stratified by the prevalence of post-intensive care syndrome (PICS) at **24 months of follow-up**. The whiskers represent lowest and the highest value. The box represents 50% of the data with the 25th percentile as the lower border and the 75th percentile as the upper border. The median is depicted as a horizontal line in each box.

*P-value from the univariate model is presented.
Abbreviations: PICS *Post-intensive care syndrome*. EQ-VAS *EuroQol Visual Analog Scale*.

Supplementary Figure 2. Distribution of EQ-VAS results at 24-months of follow-up. *Abbreviation: EQ-VAS EuroQol Visual Analog Scale.*
