

GAPDH

SRSF3

Western blot analysis showing the interaction of HA-SRSF3 with Rb, cyclin B1, c-Jun, and HA. The blot is divided into two main sections: HA-SRSF3 (Gr) and HA-SRSF3 1-24 (TR). The first section shows bands for ACTIN, p53, cyclin B1, and SRSF3. The second section shows bands for Rb, cyclin B1, c-Jun, and HA. The first two rows of bands in the first section are highlighted with yellow boxes. The table below the bands indicates the conditions for each lane.

HA-SRSF3 (Gr)					HA-SRSF3 1-24 (TR)			
1	2	3	4	5	6	7	8	9
HA (1.2mg)	0.3	0.6	0.9	1.2	0.3	0.6	0.9	1.2
