

Supplementary Figure 1:

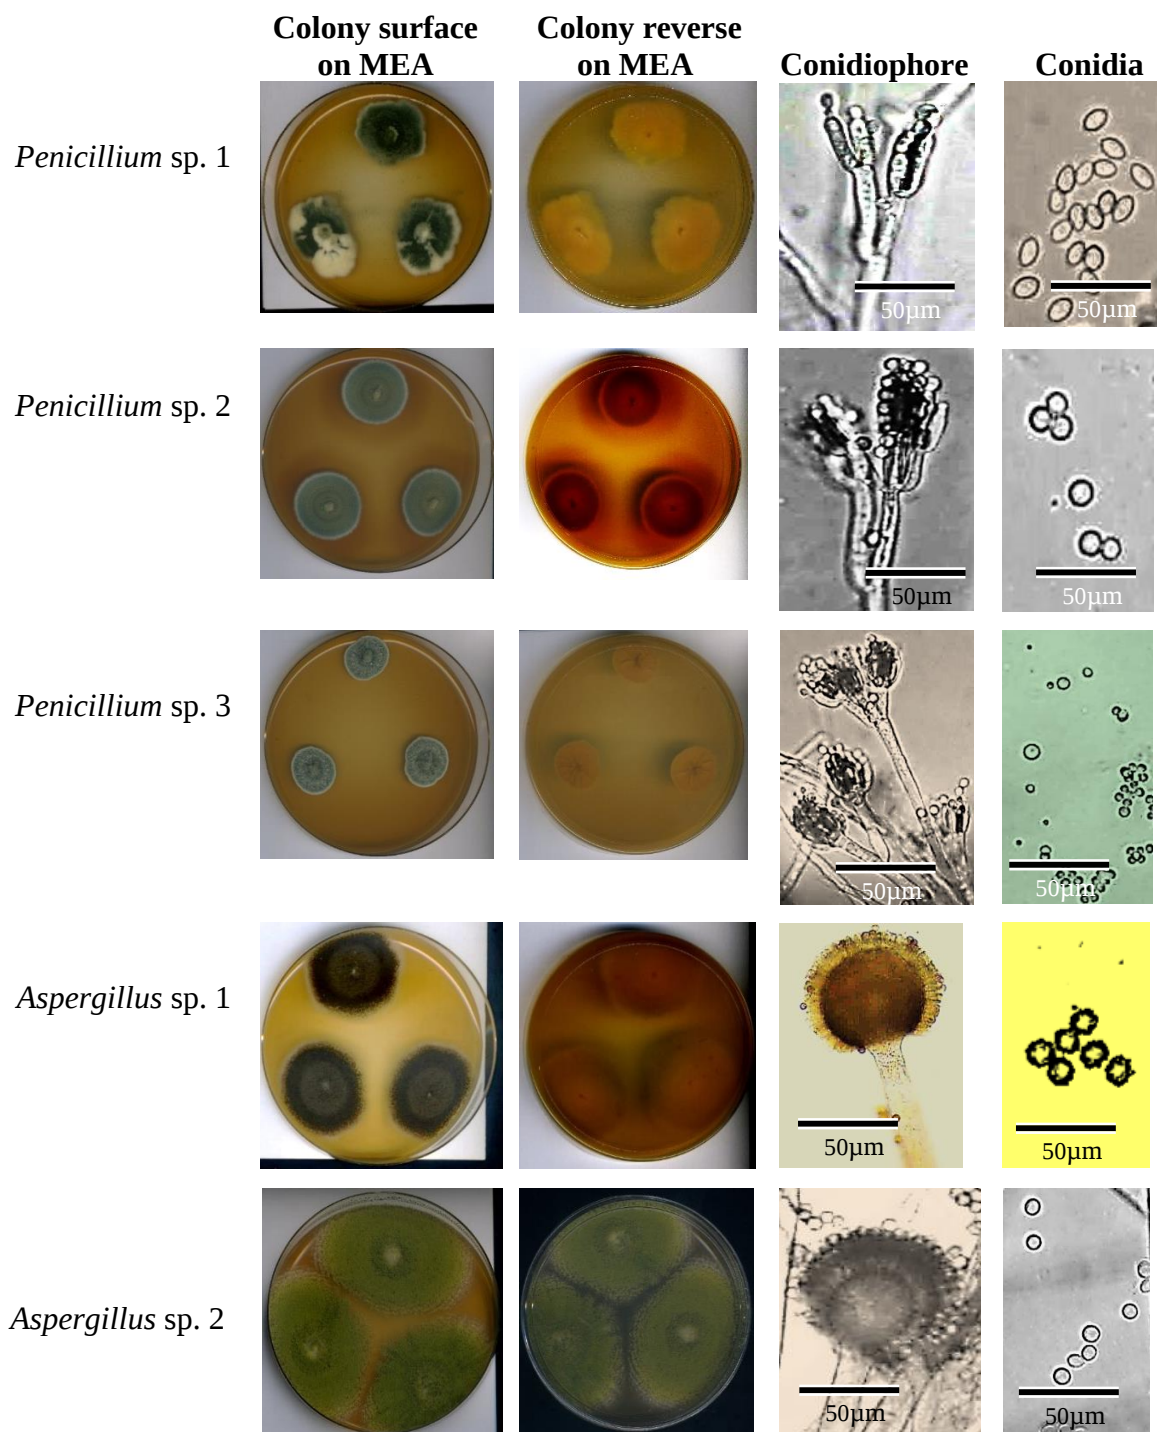

Morphological characteristics of endophytic fungi isolated from corn tissues

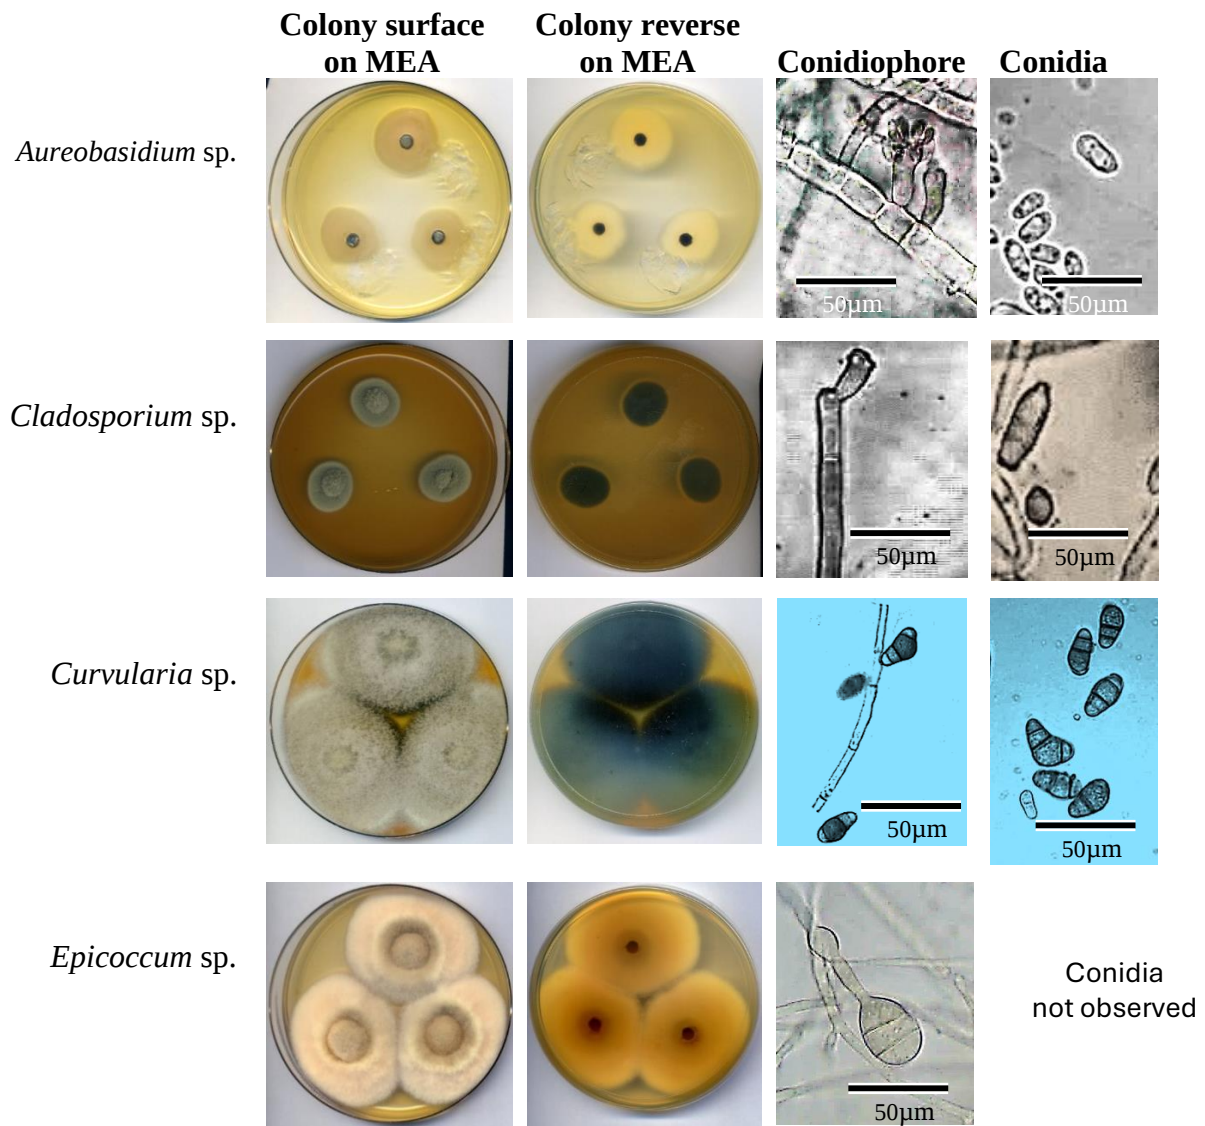

Supplementary Figure 1a. Morphological characteristics of endophytic *Fusarium* spp. isolated from corn tissues.

Supplementary Figure 1b. Morphological characteristics of endophytic *Fusarium* spp. isolated from corn tissues.

Supplementary Figure 1c. Morphological characteristics of endophytic *Penicillium* spp. and *Aspergillus* spp. isolated from corn tissues.

Supplementary Figure 1d. Morphological characteristics of endophytic *Aureobasidium* sp., *Cladosporium* sp., *Curvularia* sp. and *Epicoccum* sp. from corn tissues
