

Perception of students and factors affecting the utilization of healthcare services in a Nigerian University

The purpose of this questionnaire is to gather information about students' perception regarding healthcare utilization in a Nigerian University and the factors that may influence their decision to seek medical care on campus. The findings from this study will be helpful in identifying the barriers that students face in accessing healthcare services on campus and provide insights for improving the quality and accessibility of healthcare services. This information will aid in developing effective policies and programs that can help improve students' health outcomes. All responses will be kept confidential, and the data collected will be used solely for research purposes.
