

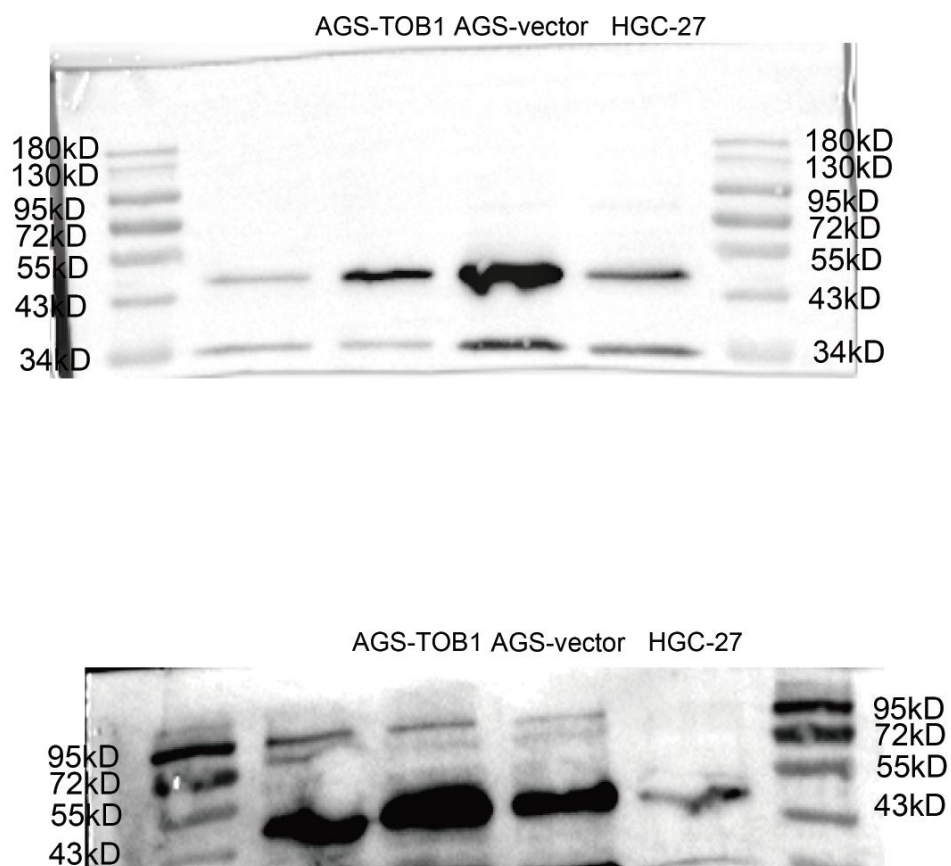

Figure 1. Identification of exosomes released by gastric cancer cells.
 (G) Expression levels of the exosomal markers TSG101 proteins as determined by western blot analysis.

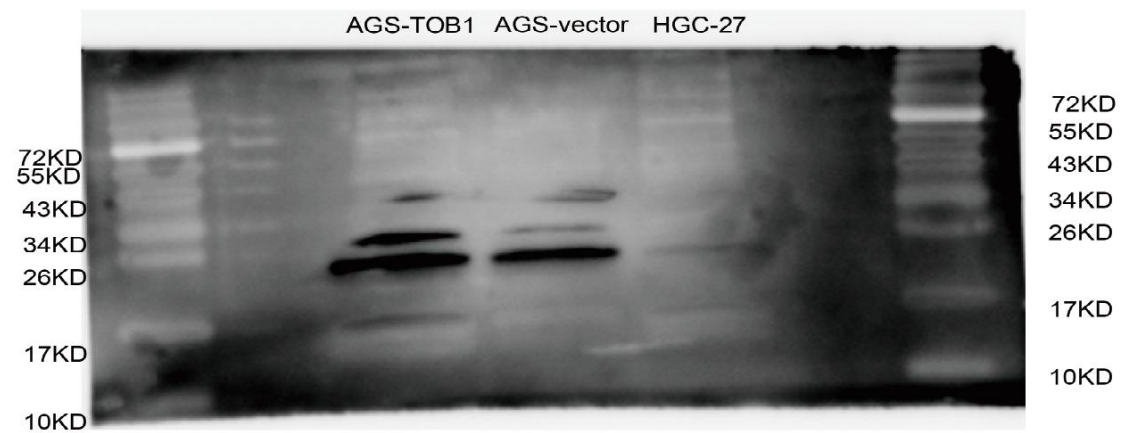

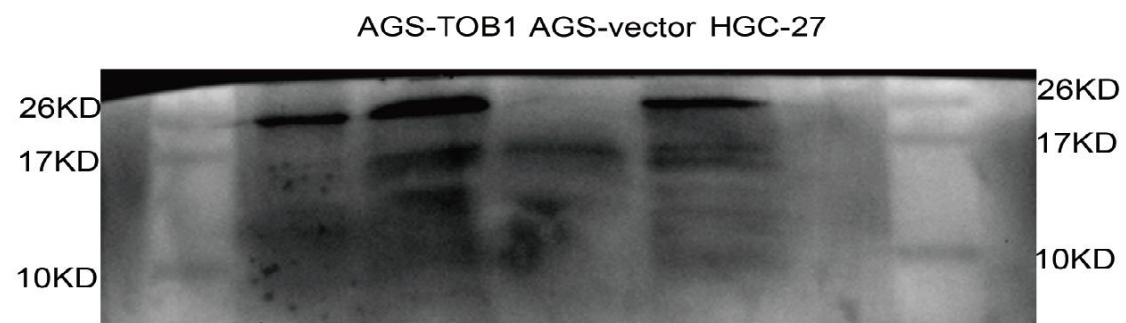

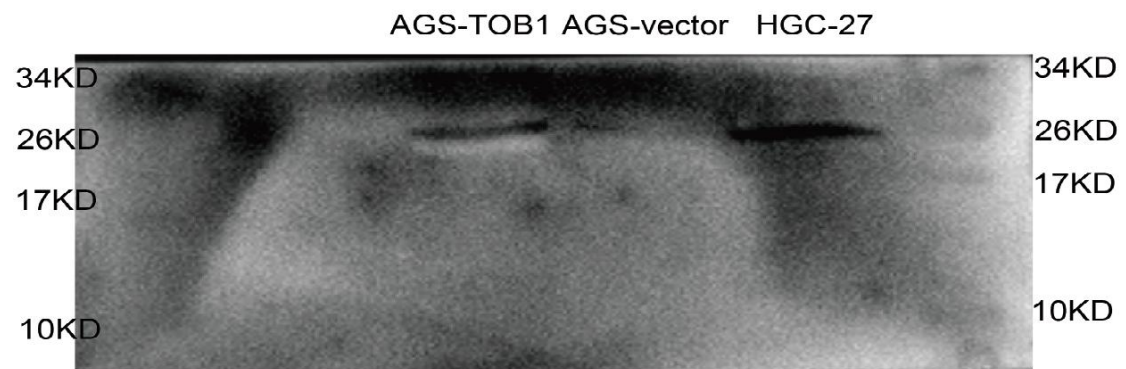

Figure 1. Identification of exosomes released by gastric cancer cells.
 (G) Expression levels of the exosomal markers CD9 proteins as determined by western blot analysis.

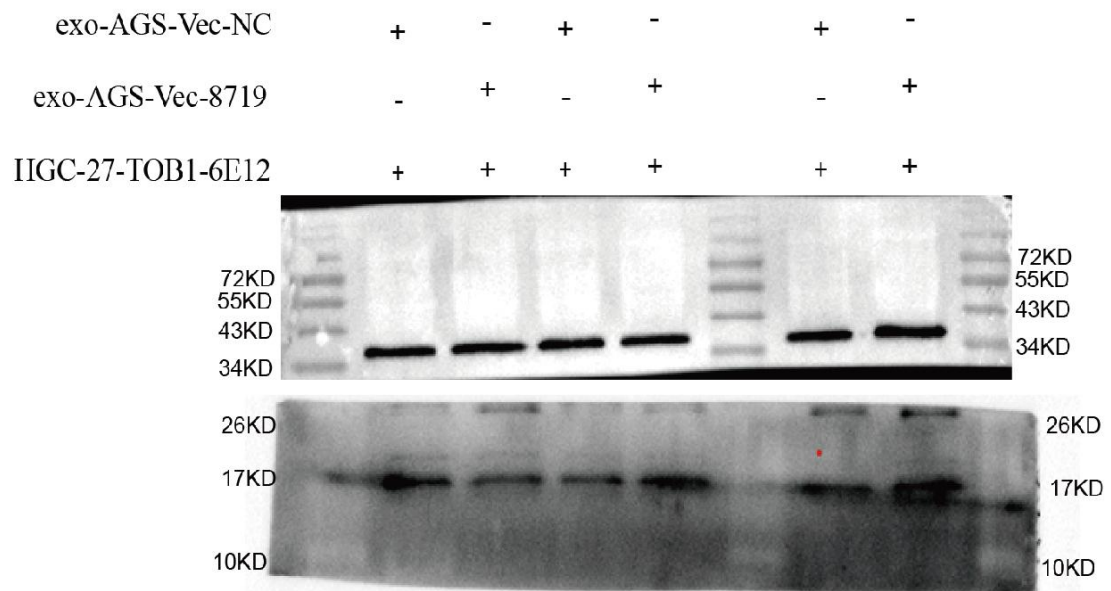

Figure 6.Exosome delivery of hsa_circ_0008719 to decelerates gastric cancer cells growth while inducing autophagy.
 (K)expression levels of the autophagy protein LC3 of HGC-27-TOB1-6E12 treated with exo- AGS-Vec-8719 and AGS-Vec-NC respectively.
