

Role of PRC1 as an Independent Adverse Prognostic Factor in Wilms Tumor: Bulk and Single-cell RNA-seq Bioinformatics and Experimental Analysis

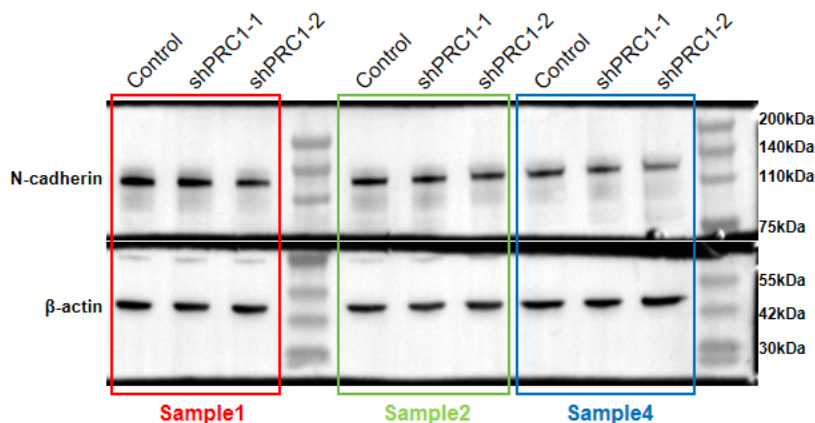

—western blotting supplementary figures

(Note: Different colors represent different protein samples.)

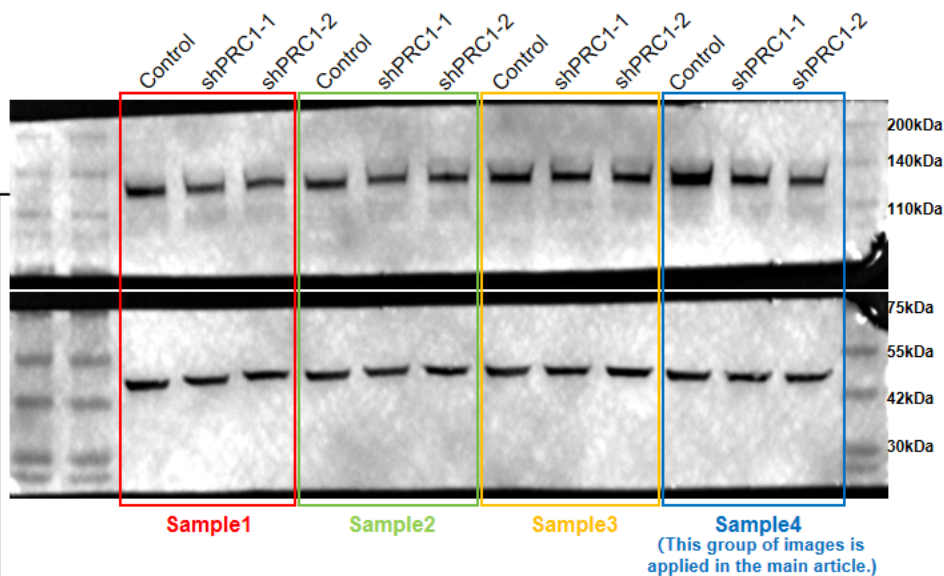

E-cadherin

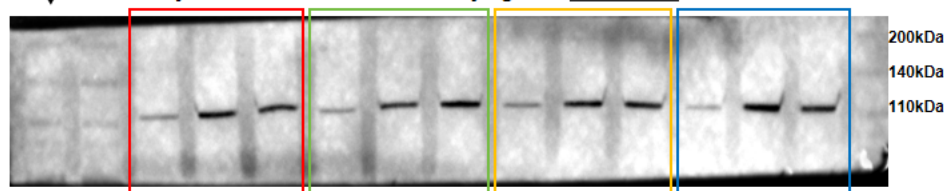

N-cadherin

N-cadherin & E-cadherin (paired)

The antibodies on the membrane are stripped with alkaline stripping buffer, followed by incubation with the antibody against E-cadherin.

hsa-miR-143-3p

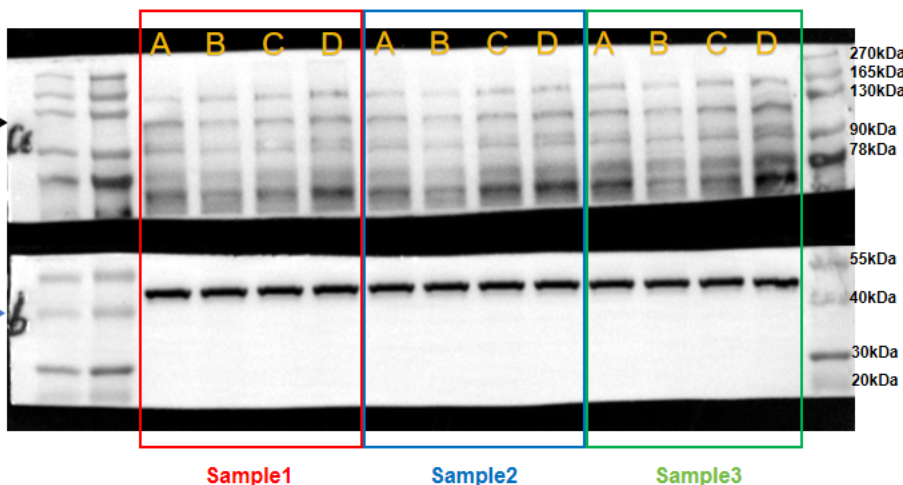

Groups:

A: mimic NC

B: miR-143-3p mimic

C: inhibitor NC

D: miR-143-3p inhibitor

(This group of images is applied in the main article.)
