
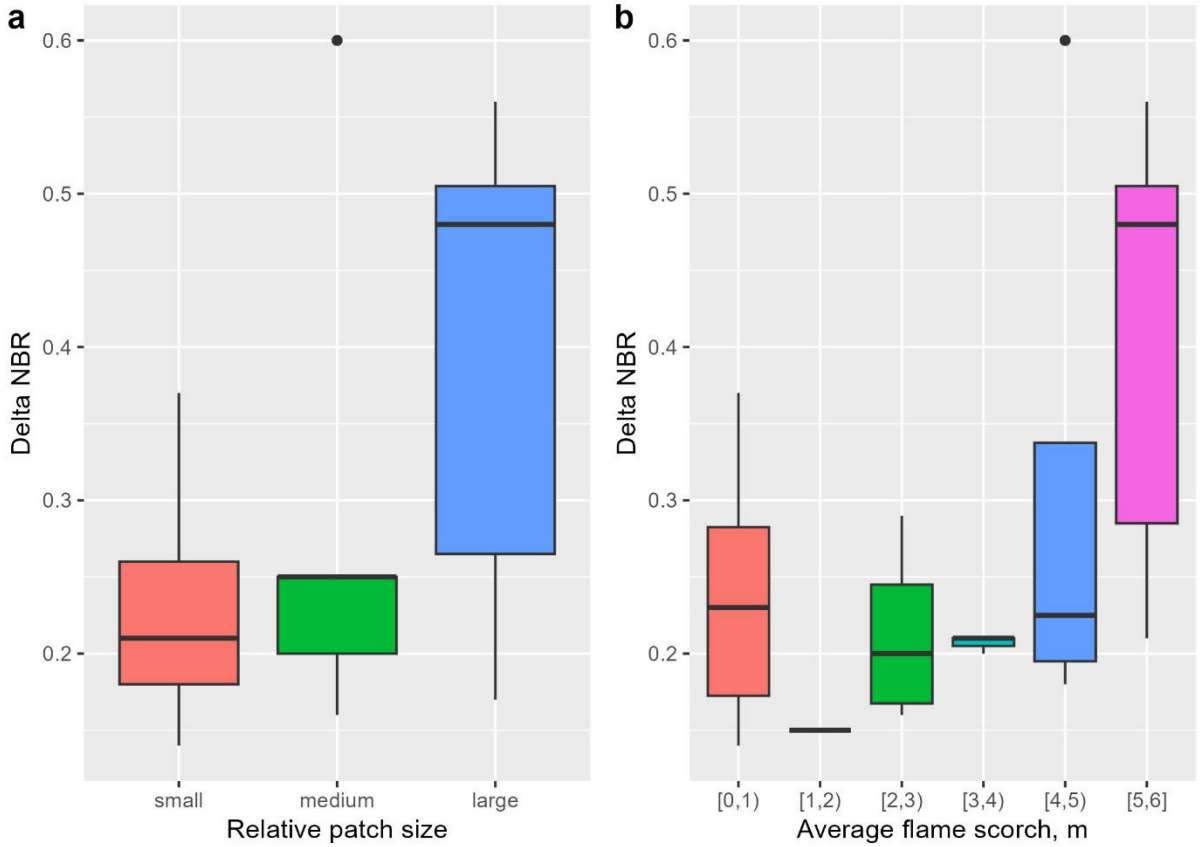

Figure S1. Distribution of relative burned patch sizes (a) and average flame scorch over bark (b) in relation to satellite-derived dNBR.

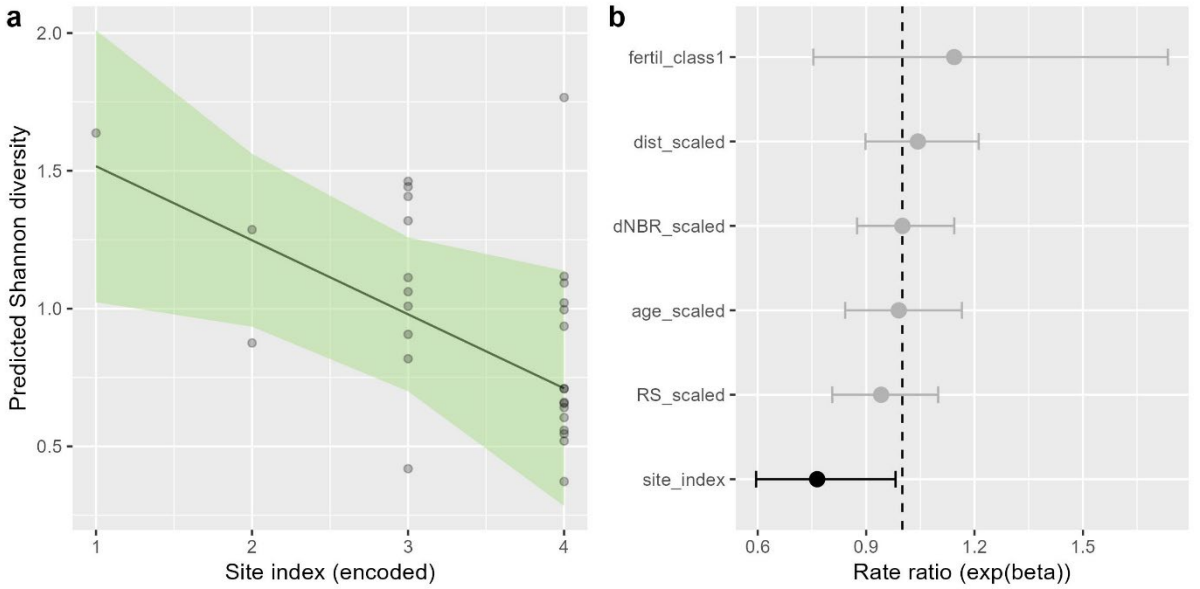

Figure S2. Effect of site index on predicted Shannon diversity (a) and beta-coefficients for all predictors in the model (b).

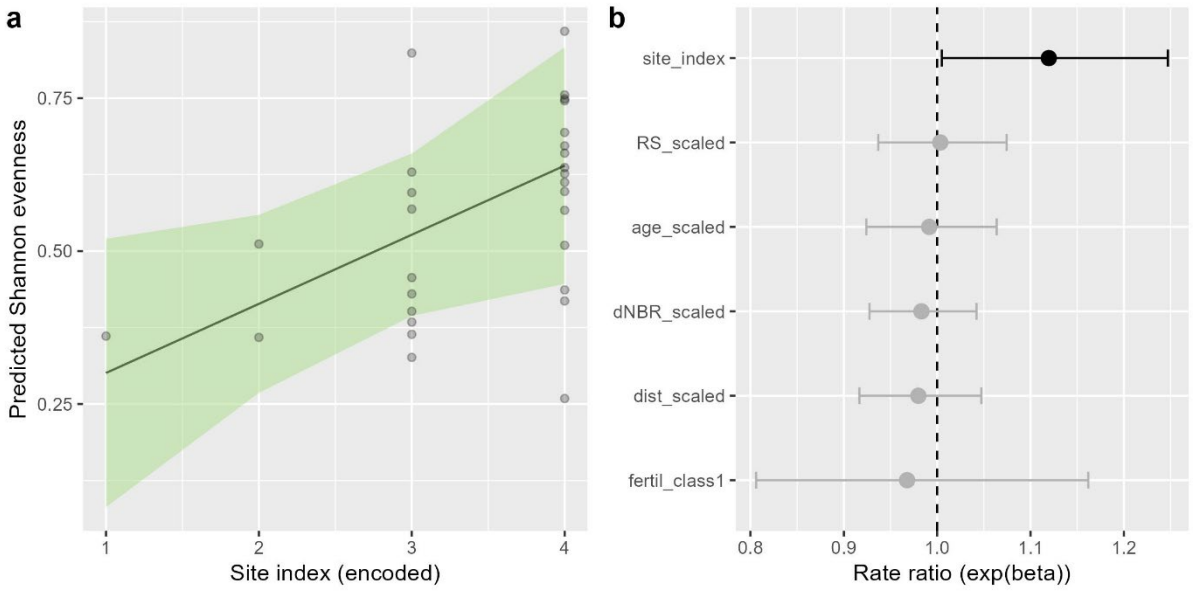

Figure S3. Effect of site index on predicted Shannon evenness (a) and beta-coefficients for all predictors in the model (b).

Table S1. List with vegetation cover by plant species detected on study transects.

Table S2. List with tree regeneration detected on study transects.
