

Descriptions of Additional Supplementary Files

Supplementary data 1

Description: Relative expression levels of the genes on chromosome 21. Genes are listed according to chromosomal position. Expression was normalized to that of cDi21 lines (n = 3 experiments per cell line). Data were analysed by Welch's two-sample t-test.

Supplementary data 2

Description: The enlarged heat map related to Figure 3b.

Supplementary data 3

Description: Source data underlying all figures.
