

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Differentially expressed genes in cell clusters

File name: Supplementary Data 2

Description: Enrichments of differentially expressed genes in cell clusters.

File name: Supplementary Data 3

Description: Gene regulatory networks for manifold-aligned cell clusters.

File name: Supplementary Data 4

Description: Gene regulatory networks for known t-types.

File name: Supplementary Data 5

Description: Testing R^2 values for electrophysiological feature prediction from gene expression.
