

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Overview of sequencing, mapping and cells included after filtering.

File name: Supplementary Data 2

Description: Top 20 differentially expressed genes for all splenic cells.

File name: Supplementary Data 3

Description: Top 100 most variable differentially expressed genes across pseudotime for B cells.

File name: Supplementary Data 4

Description: Number of cells present in each named cell cluster.

File name: Supplementary Data 5

Description: B cell sub-clusters top differentially expressed genes.

File name: Supplementary Data 6

Description: T cell sub-clusters top differentially expressed genes.
