

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Genetic instrument for kidney function developed from the GWAS metaanalysis within the individuals of European ancestry of the CKDGen data.

File name: Supplementary Data 2

Description: Non-significant causal estimates of 49 biochemical parameters from genetically predicted eGFR.

File name: Supplementary Data 3

Description: : GWAS summary-statistics towards 60 biochemical parameters of 140 SNPs which were instrumented to genetically predict kidney function.
