

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Clinical and genetics information of all acromegaly patients

File name: Supplementary Data 2

Description: Genes analyzed by target capture sequence

File name: Supplementary Data 3

Description: Clinical information of all patients with non-functional pituitary adenoma

File name: Supplementary Data 4

Description: KEGG analysis of molecular groups that showed significantly higher expression fluctuations in cluster 3 compared to cluster 1 in consensus clustering-based proteomics

File name: Supplementary Data 5

Description: Gene ontology terms of molecular groups that showed significant expression fluctuations with and without GNAS mutations in proteomics

File name: Supplementary Data 6

Description: The source data behind the graphs in the paper
