

Description of Additional Supplementary Files

File name: Supplementary Data 1

Description: Differential gene expression in bulk RNA-seq data.

File name: Supplementary Data 2

Description: Differentially expressed and associated genes for fibroblast, cardiomyocyte, and endothelial cell manifolds.

File name: Supplementary Data 3

Description: Cluster-specific differentially expressed genes between coiled and control samples.

File name: Supplementary Data 4

Description: Cell Ranger quality control.

File name: Supplementary Data 5

Description: Gene coordinates.

File name: Supplementary Data 6

Description: Cell Metadata.

File name: Supplementary Data 7

Description: Gene set signatures.

File name: Supplementary Data 8

Description: Gene set variation analysis.
